

Neuron Expert

A cutting-edge platform for seamless global communication and collaboration, breaking down language barriers. Users can interact naturally in their native languages, access accurate answers, and work with both individual and large-scale entities like people, documents, and products. Neuron Expert is your universal communicator in the global economy.

Key Features

Breaking Language Barriers

- Communicate and work in over 57 languages.
- Real-time translation for both chat and voice interactions.

Multimodal Content Support

- Handle various content types seamlessly: text, images, videos, and voice.

Seamless Integration

- Connect with large language models (LLMs).
- Access websites, news agencies, and social media platforms seamlessly.

- ✓ Neuron AI can deliver responses using 7 powerful large language models

OpenAI LLAMA 2 ANTHROPIC

We measure speed and hallucinations every minute across all models and automatically switch based on response speed and quality.

[Learn more](#)

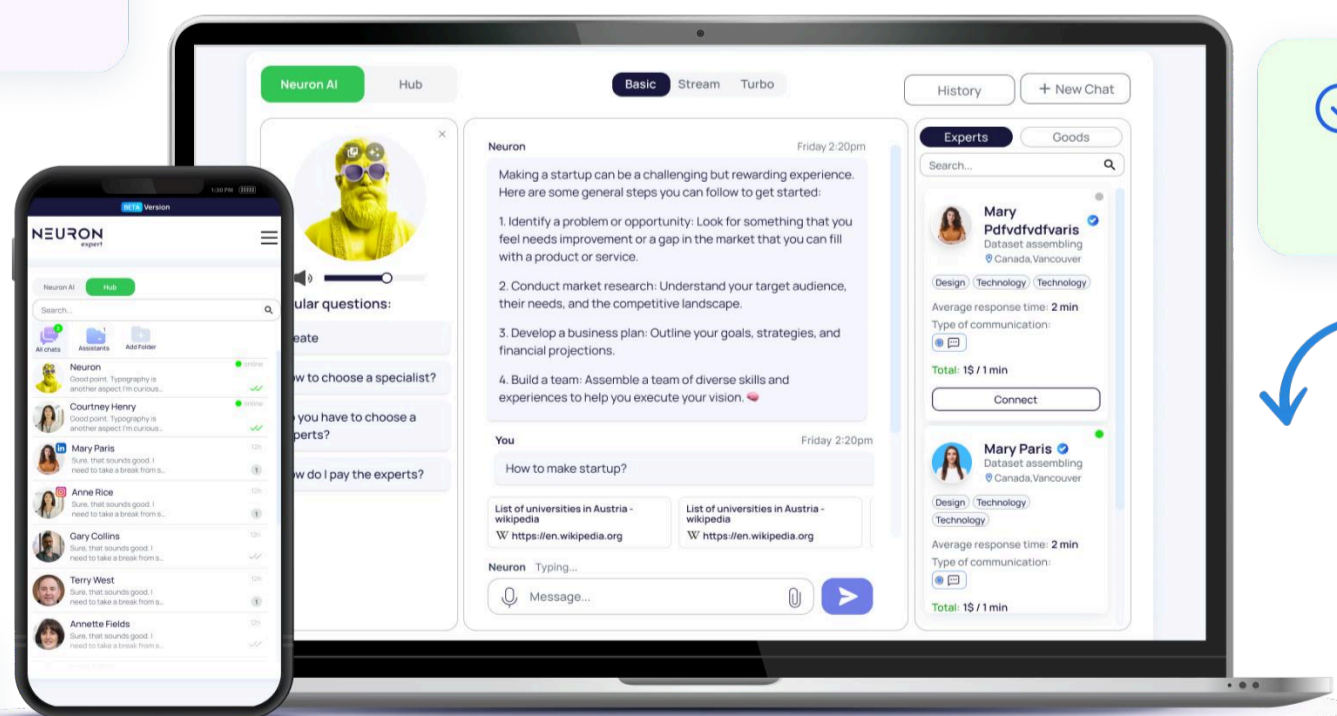

- ✓ Perform real-time research by analyzing search engine results to gather the latest data and find images

- ✓ Neuron AI operates in both chat and full voice communication modes, making interactions feel like conversations with a human capable of performing a wide range of tasks.

- ✓ Additionally, our new **research mode** enables the analysis of numerous websites, including YouTube videos, to compile detailed reports on specific topics.

- ✓ Neuron AI connects users with experts from our community who can assist with complex questions.

- ✓ Generate illustrations based on your text prompts

- ✓ Neuron AI works with various types of content such as:

Text Images Videos Audio Presentations Spreadsheets Websites

Core Elements of the Platform

Neuron AI

- Neuron AI is your indispensable assistant, equipped with the full range of tools found in platforms like ChatGPT or Perplexity, instant web search capabilities, and unique features for finding experts and products.

Neuron Network

- The Expert Community is a platform where professionals can conduct paid consultations, design and offer educational programs, and share experiences with their peers.

Neuron Tools for everyone

- Personal CRM**
 designed to build meaningful connections with your partners and friends.
- Digital Business Card**
 seamlessly integrated with your personal CRM
- Neuron Meet**
 An online meeting platform with voice, video, and screen sharing capabilities.

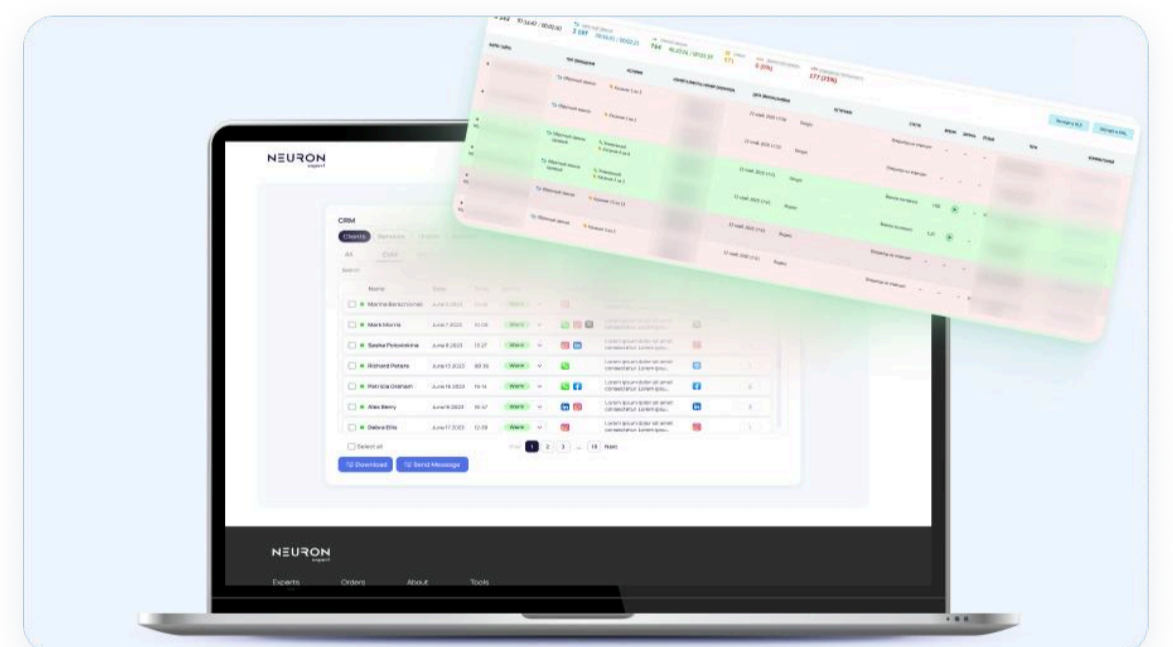

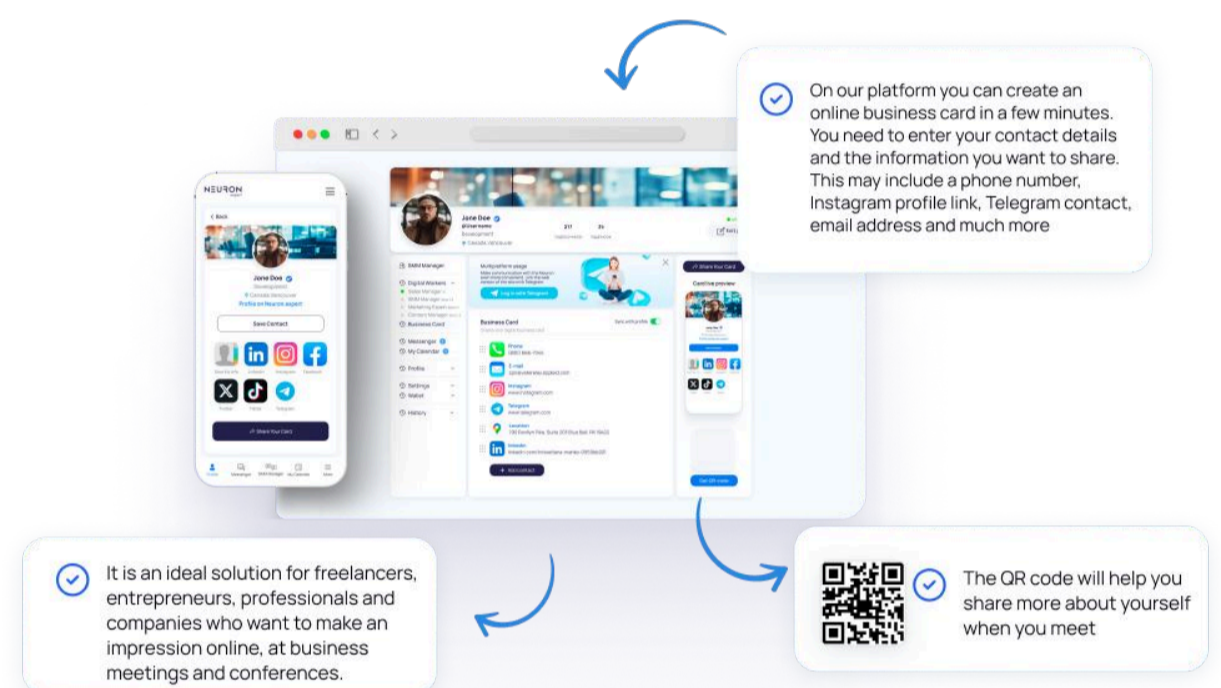

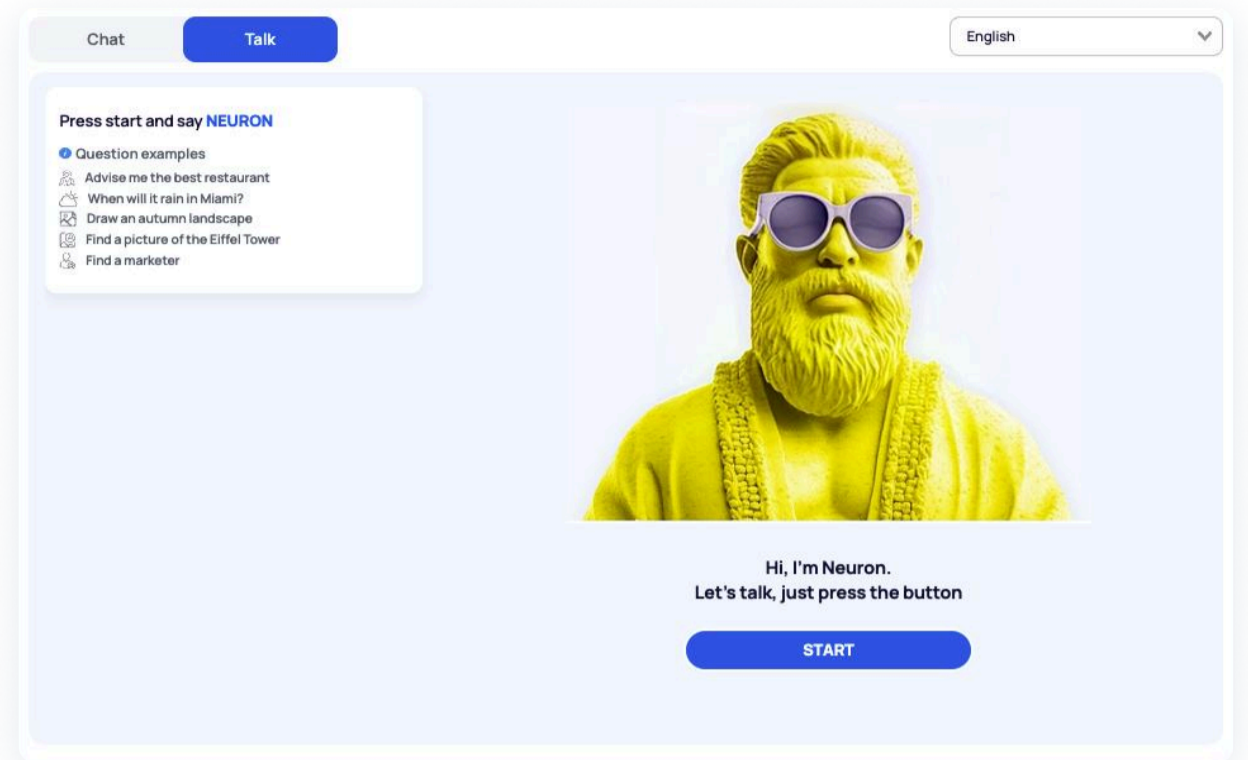

Tools for Experts

Expert AI & Avatar

- Each expert gets a personal AI assistant to showcase their expertise, services, and products, qualify clients, provide consultations, and support sales.

Neuron Education

A personalized training program builder where AI assists experts in creating text, graphic, and video content for lessons, while an AI examiner evaluates how well users have mastered the material.

Neuron AI

Neuron AI delivers fast and accurate query processing by analyzing data and combining information from diverse sources, including various LLMs, websites, news agencies, and social media. It efficiently finds solutions, whether it's locating experts, products, or other data, and generates detailed reports with comprehensive and precise insights.

Information Search

Neuron AI excels at finding and processing information across various domains. It can search for data, generate and display images from the internet, and efficiently work with documents and multiple file types. Whether you need to analyze, edit, or organize information, Neuron AI provides comprehensive tools to handle tasks seamlessly, ensuring accuracy and ease of use.

Expert Search

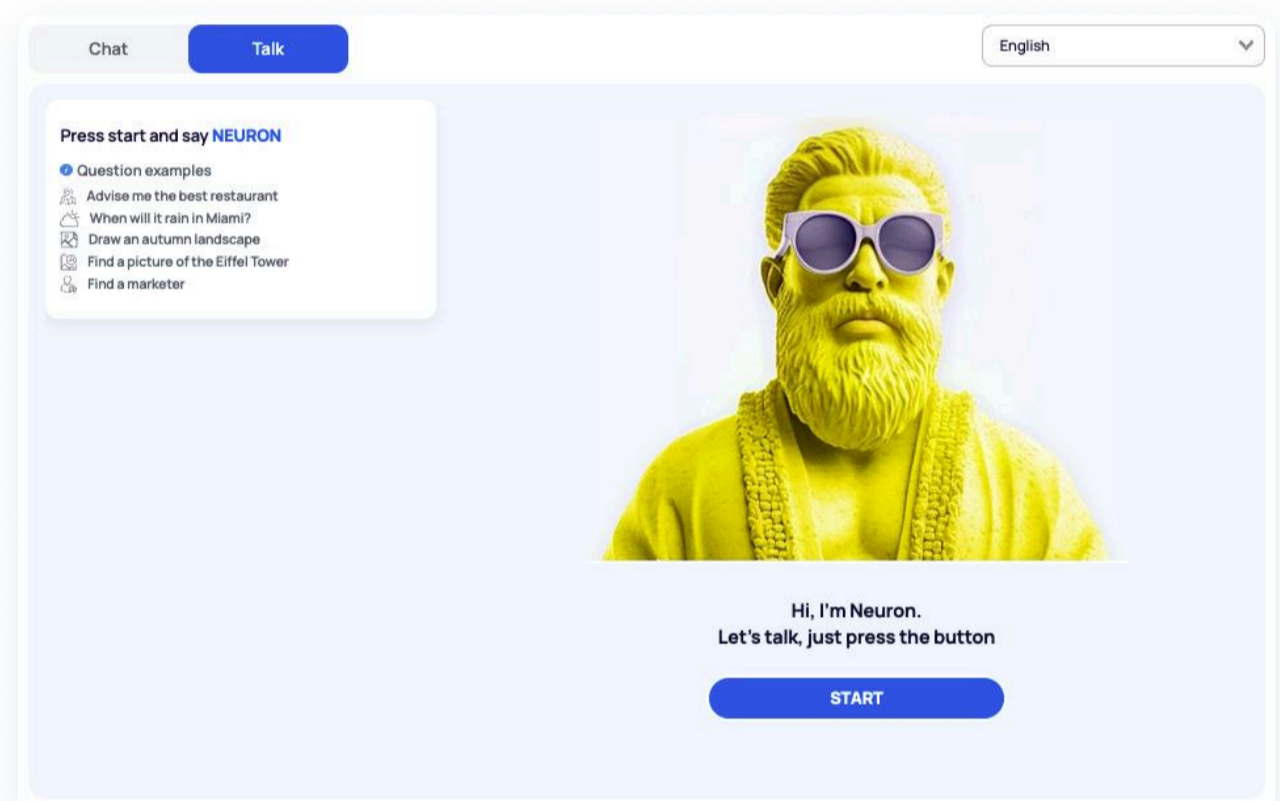

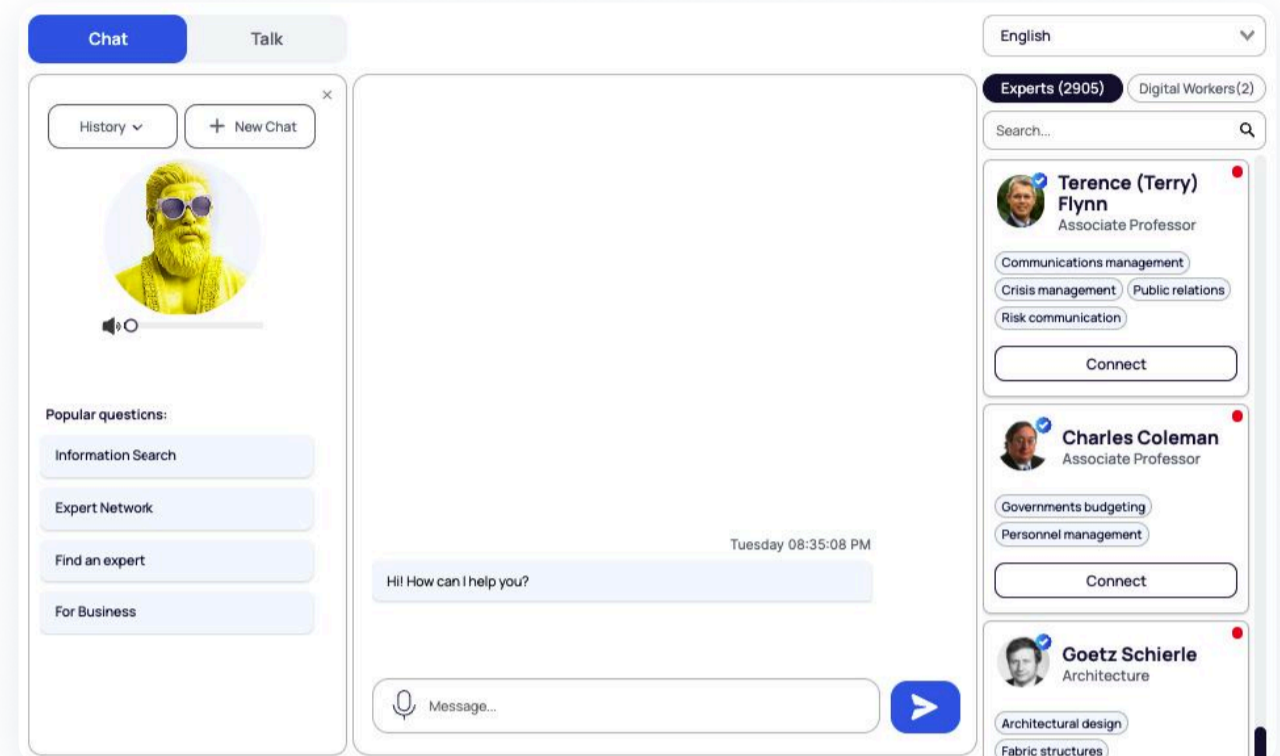

Neuron intelligently searches for experts tailored to your needs, connecting you directly with professionals who can tackle complex challenges. These experts provide in-depth knowledge and practical solutions, streamlining the problem-solving process.

Product Search

Neuron quickly compares product features, explores alternatives, and finds solutions perfectly suited to your needs. It's a smarter and faster way to discover the best option.

Event Search

It will find upcoming events tailored to your criteria by analyzing dozens of websites

Instant AI responses

Our AI uses 7 models, automatically selecting the fastest and most accurate one for optimal performance

In-depth research in search engines

The AI decides when to pull information from the web, analyzing multiple pages to create a report from relevant sources

Native Voice Communication

The AI supports both chat and voice modes, creating natural, human-like interactions for a wide range of tasks

Neuron Network for Experts and companies

A professional community where you can monetize your expertise, expand your client base, and offer consultations and educational programs.

Opportunity to Earn Money with Your Expertise

- ✓ **Consultations**
Earn money through consulting and teaching
- ✓ **Educational Programs**

Expert AI & Avatar

Personal assistant and representative

Expert AI

- ✔ Your virtual assistant is always available, presenting you as a top professional in the expert network. It keeps your profile up-to-date, enhances visibility, and effectively showcases your expertise and skills.

Consultation Automation

- ✔ Your avatar efficiently manages the scheduling process by automating time coordination and meeting arrangements. This allows you to focus on key tasks while optimizing interactions with clients and partners.

Multilingual Capability

- ✔ Your avatar speaks all major languages, ensuring seamless communication with clients and partners worldwide. It delivers accurate and professional interactions in any language, eliminating potential language barriers.

Precise Data Retention

- ✔ The avatar securely stores all key information about your clients and interactions, ensuring access to critical data at any time. It leverages this information to maintain strong, long-term relationships and enhance the quality of communication.

Your Digital Avatars

Create a fully customizable digital avatar by simply uploading your photo and selecting a voice from an extensive library, making it uniquely yours.

Avatar in the Neuron Network

- ✔ Leverage your avatar as a professional expert in the Neuron Network. Whether for consultations, answering questions, or sharing knowledge, your avatar serves as your professional representative, available 24/7 to engage with clients worldwide.

Avatar for Video Creation

- ✔ Create an avatar for video production with the Content Manager. Produce engaging and professional videos featuring a digital persona that aligns with your style and tone—no need to appear on camera.

Personal CRM

An Innovative Solution for Efficient Contact Management

Share Your Virtual Business Card

- ✓ Easily share your virtual business card at networking events and schedule meetings directly from it with just two clicks, seamlessly adding them to your CRM.

Attract clients easily

- ✓ Receive high-quality leads from any source by optimizing the process of searching for and interacting with new clients

Manage Your Personal CRM

- ✓ Keep track of your contacts by adding friends and acquaintances to your personalized CRM, ensuring you stay connected effortlessly

Follow-ups

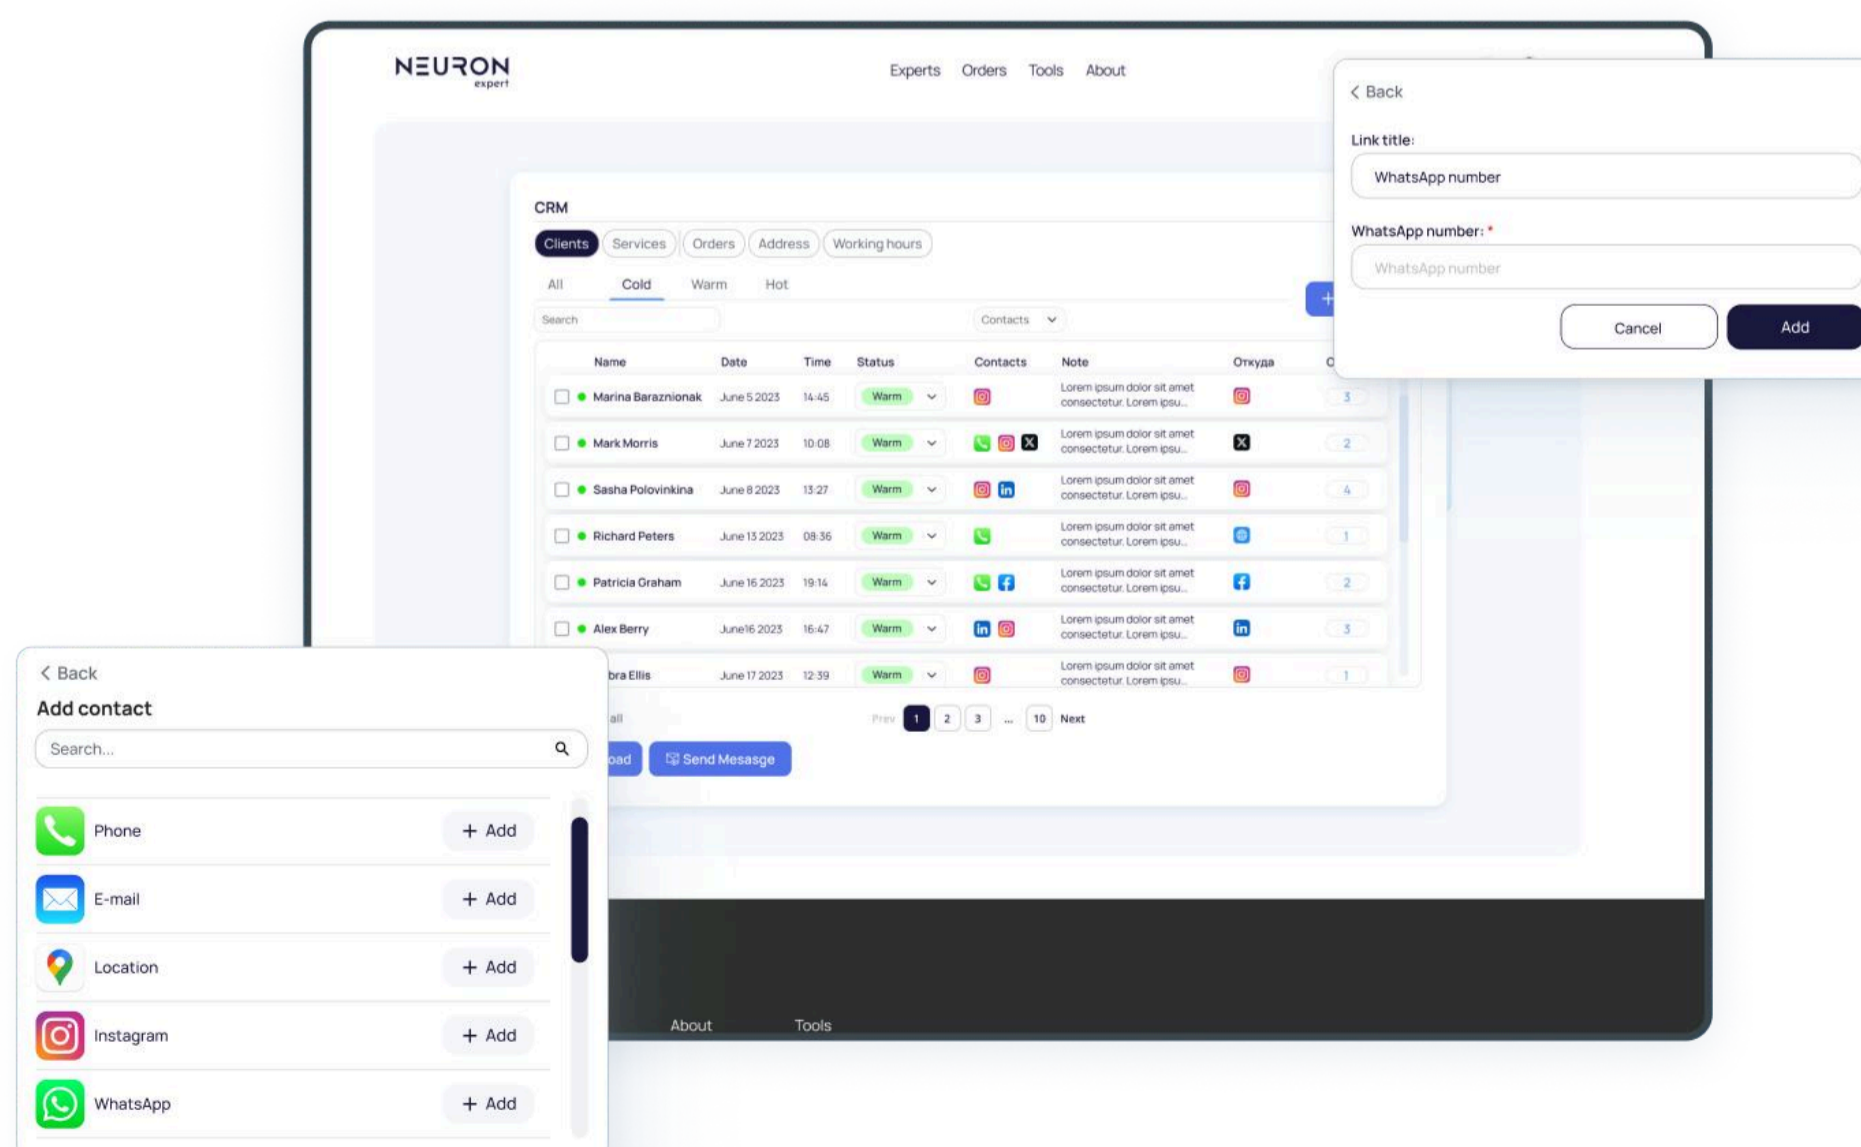

- ✓ The Follow-ups feature allows you to maintain communication with your contacts, track important details, and send timely reminders or additional materials

Task Management

- ✓ Organize, track, and complete tasks efficiently.

A CRM that seamlessly integrates with any other CRM systems via API

Digital Business Card

A contemporary approach to showcasing your identity and a gateway to engaging with a network of professionals

Business Card Creation

- ✓ Fill your digital business card with contact details, social media, messengers, and website links for a convenient all-in-one profile.

QR Code Generation

- ✓ Each business card includes a unique QR code for quick access to your details—just scan and open instantly.

Schedule a Meeting

- ✓ The Schedule a Meeting feature allows others to book appointments with you directly through your business card, simplifying scheduling and making communication effortless.

Use of Digital Business Card

QR code in the presentation

- ✓ Including a QR code in a presentation at conferences or seminars allows the audience to easily access your contact information

Put it under a case

- ✓ Print out a Business Card to place under a smartphone case and use it for introductions at business meetings

Attach it to an email

- ✓ Attaching a digital business card to emails increases the level of professionalism of communication

Personal PR Manager

Indispensable tool for building and managing your personal brand.

It helps you:

✓ Create high-quality content for your social media and website.

✓ Adapt content to the required format and size for each platform.

Automatically publish posts on the following social networks:

- Instagram (Business Page)
- Facebook (Business Page)
- ✓ Twitter (or X) (Personal or Business Page)
- LinkedIn (Personal or Business Page)
- TikTok
- YouTube
- VK (VKontakte)
- Telegram (Groups and Chats)

This tool saves you time and effort, allowing you to focus on what truly matters—growing your brand and engaging with your audience.

Neuron Education

An innovative platform designed to create and deliver next-generation educational programs. It empowers experts and educators to develop courses that are highly personalized, combining advanced AI technologies with multimedia content for an enhanced learning experience.

Key Features of Neuron Education:

User-Friendly Education Program Builder:

- ✓ Allows educators to design courses by breaking each lesson into components such as text, images, charts, and video materials.
- Supports a multimodal approach, catering to auditory, visual, and kinesthetic learners.

Interactive Content:

- ✓ Video lessons featuring an expert avatar explaining the material.
- Integration with audio recordings, pictograms, and infographics for better understanding.

Personalized Learning:

- ✓ Tracks user progress and stores test results for personalized recommendations.
- Provides reminders and tips to help learners stay on track and complete their courses.

Personalized Learning:

- ✓ Tracks user progress and stores test results for personalized recommendations.
- Provides reminders and tips to help learners stay on track and complete their courses.

Knowledge Assessment:

- ✓ Interactive quizzes after each lesson to check understanding.
- A final exam, monitored by a virtual examiner, to evaluate mastery of the entire course.

Benefits:

For Experts:

- ✓ A unique opportunity to monetize their knowledge by creating and distributing high-demand courses on the platform.

For Learners:

- ✓ Easy access to educational materials in a personalized format that suits individual learning styles.

AI Integration:

- ✓ Simplifies the learning process and adapts programs to the specific needs of each student.

Neuron Education opens new possibilities in education by providing an effective way to learn, test knowledge, and achieve outstanding results.

Technologies

Our platform integrates cutting-edge technologies and modern solutions to create a unique ecosystem capable of handling the most complex business challenges.

Artificial Intelligence (AI)

We use advanced artificial intelligence technologies to achieve maximum efficiency.

- ✓ **Request processing:**
Instant and accurate processing of user requests, including complex scenarios with multiple variables.
- ✓ **Real-time data analysis:**
The ability to process and analyze large volumes of data for prompt decision-making.
- ✓ **Multilingual translation:**
High-precision automated translation of texts and voice messages into dozens of languages.
- ✓ **Content creation:**
Generation of text, voice, and visual content tailored to the user's individual parameters.

Blockchain integration

- ✓ **Transparency and security:**
All transactions are recorded in a decentralized network, ensuring data immutability.
- ✓ **Smart contracts:**
Automation of processes to minimize manual work and increase efficiency.
- ✓ **Transaction record analysis:**
Convenient data recording and processing.

SIP server (Session Initiation Protocol server)

- ✓ **Multimodal communication:**
Providing voice, text, and video communication through integrated solutions.
- ✓ **Independence from external networks:**
The ability to operate autonomously.
- ✓ **High performance:**
Reliability and stability for use in a corporate environment.

Multilingual backend

- ✓ **Built on modern programming languages:**
Kotlin: High performance and stability.
Python: Data analysis, machine learning, and AI tool.
- ✓ **The flexible architecture allows the system to scale for any tasks.**

Modern frontend

- ✓ **Developed using Vue.js:**
Intuitive user interface.
- ✓ **Support for all devices:**
Optimization for working on any platforms, including mobile devices.

Quality and performance monitoring

- ✓ **We measure the speed and accuracy (hallucinations) of all language models every minute, ensuring automatic switching between the 7 best large language models based on response quality and speed.**

These components work in synergy, creating a powerful, flexible, and reliable platform for any business tasks.

Custom AI

Develop AI Agents for the Market

- ✓ Create unique virtual assistants with specialized skills, integrated with various data sources, ready to be deployed across diverse business sectors.

Profit from Sales

- ✓ List your AI agents on the marketplace, where businesses and entrepreneurs can purchase ready-made solutions tailored to their needs.

Earn Passive Income through Rentals

- ✓ Lease your agents for tokens. They operate on websites, social media, and messaging platforms, while you earn profits from their usage.

Monetization Platform

- ✓ AI agents streamline business processes for clients, boosting sales and engagement, generating revenue for their creators.

Grow Your Portfolio

- ✓ Build in-demand AI agents and expand your market presence. The more your creations are utilized, the greater your reputation and income potential.
